- Technical consultations
- Training briefs on the Navy Drug Screening Program for your command

*An Echelon Five
Command of the
Navy and Marine Corps
Public Health Center*

Our Mission and Vision:

Our Mission

To support winning the global war on terrorism readiness by deterring illegal drug use through forensic drug testing, expert testimony, consultation, education, and methods development.

Our Vision

We will consistently exceed our customers' expectations by being the benchmark in forensic drug testing, methods development, process optimization, and

Zero tolerance for illegal drug use also means zero tolerance for drug testing errors:

- Specimens reported as positive, have tested positive on 3 independent tests: screen, rescreen and confirmation.
- Each test was performed on a separate aliquot of the specimen.
- Data from all 3 tests are reviewed 4-5 times (total > 12).
- Extensive QA/QC program
- Positive samples are retained for 1 year and may be retested upon request by the submitting command.

Upholding HONOR, COURAGE, & COMMITMENT through science.

What We Do:

- The Navy Drug Screening Laboratory, San Diego, provides quality drugs of abuse testing using state of the art testing procedures.
- The laboratory utilizes advanced clinical chemistry analyzers and modern gas chromatograph / mass spectrometers to provide accurate drug testing results.
- Each year the NDSL San Diego tests well over 800,000 specimens.
- The laboratory has the capabilities to analyze urine samples for marijuana and cocaine metabolites, amphetamines, methamphetamines including Ecstasy, Codeine and Morphine, Heroin, phencyclidine (PCP), Oxycodone and Oxymorphone.
- We have a staff of senior scientists trained to provide expert witness testimony at military legal proceedings.
- Conduct and participate in scholarly research to develop and implement new drugs of abuse testing methodologies and technologies.
